PROFESSIONAL SUMMARY

Early-career developer focused on data and systems. I build full-stack applications (Node.js, React and PostgreSQL) that solve real operational problems, including data modeling, authentication, role-based permissions and API integrations. I am looking for my first opportunity in tech, especially in data and databases.

TECHNICAL SKILLS

Data & databases: SQL, PostgreSQL, Supabase, data modeling

Backend: Node.js, Express, REST APIs, JWT authentication, OAuth2

Frontend: React, JavaScript, Tailwind CSS, HTML & CSS

Tools: Python (fundamentals), Linux (fundamentals), Git & GitHub, Scrum

EXPERIENCE

E-commerce Assistant — Mellone (footwear e-commerce), São Paulo, Brazil Jul 2024 – Present

- Coordinate fulfillment operations: picking, order checking and shipping, including workflow design and operating manuals.
- Manage the TikTok Shop: catalog, affiliate program, customer CRM and return/refund rules.
- Built an internal operations portal (Node.js, React and PostgreSQL/Supabase) with role-based access control, audit logs and marketplace API integrations.
- Automated data extraction from invoice XML files, replacing a manual process.
- Standardized product descriptions and size charts for the catalog.
- I develop with AI support (Claude Code and Codex): I define what gets built and how the data is organized, and I test before release.

PROJECTS

Operations Portal (Node.js, Express, PostgreSQL (Supabase), React, Tailwind CSS). Internal portal with 4 access levels, permissions per module and action, audit logs with IP, a block-based manual editor and a returns module integrated with marketplace APIs (OAuth2 and webhooks).

EAN Extractor (React, JavaScript). Web app that extracts EAN, reference, model/color and size from invoice XML files, applying parsing rules per supplier format, with automated tests.

Tá Anotado (Electron, JavaScript). Personal to-do list desktop app.

Fulfillment internal tools (HTML, CSS, JavaScript). Automatic size chart generator and a digital picking guide with workflows for the fulfillment team.

EDUCATION

Information Technology Management — SENAC São Paulo (online) Feb 2024 – Expected mid-2027

CERTIFICATIONS

- Scrum Fundamentals Certified (SFC) — ScrumStudy, 2024
- Performance Management — Qulture.Rocks, 2024
- Microsoft Azure Fundamentals (AZ-900) — in preparation
- Junior Mobile Developer (18 months) — Brasil Mobile School (BMS)
